SUMMARY

BS Information Technology graduate (Cum Laude, 2026) from Sorsogon State University with hands-on experience building React, React Native, and Godot applications end-to-end — from Figma wireframes to Supabase-backed production features. Background also spans IT networking/field installations, procurement, and precision manufacturing, plus 29 completed technical certifications (16 from Anthropic, covering the Claude API, Claude Code, and Model Context Protocol) and a self-built AI-assisted development workflow using a custom 5-agent orchestration system. Seeking remote or hybrid roles in frontend/full-stack development, IT support, or AI-assisted engineering.

TECHNICAL SKILLS

Languages & Frameworks: JavaScript, TypeScript, React, React Native, Expo, HTML5, CSS3, GDScript

Backend & Data: Supabase, PostgreSQL, SQL, RESTful APIs, Relational Database Design

AI Tools & Workflows: Claude (API, Code, MCP, Agent Skills, Subagents), OpenCode CLI, Windsurf, Cursor, NotebookLM, Google Stitch, Graphify (custom knowledge-graph tooling)

Design & Prototyping: Figma, Canva, AutoCAD, UI/UX Wireframing

Game Development & Media: Godot Engine (GDScript), Aseprite, Pixellab AI, Blender (basics), ffmpeg

Networking & Systems: VLAN, Optical Fiber, UTP Cabling, Server Maintenance, CCTV & Port Testing

Procurement & Documentation: RFQs, Bid Documentation, Costing Spreadsheets, Microsoft(Excel,Word,Powerpoint), Google Drive

PROFESSIONAL EXPERIENCE

IT Products/Network Associate (BSIT OJT/Internship) — Quanby Solutions Inc. — Legazpi, Albay

Jan 2026 – Apr 2026

- Canvassed IT hardware/networking products and prepared Requests for Quotation (RFQs) with 30% markup pricing in Microsoft Excel
- Reviewed bidding documents and balanced procurement support with field networking projects based on active bid wins
- Built lightweight AI-assisted scripts (Windsurf) to search and filter supplier files in Google Drive, and used AI/LLM research tools to source alternative products when internal options were unavailable
- Installed and maintained servers, CCTV systems, and optical fiber/UTP connections for government clients including DILG Region V, TESDA Pili, and the Department of Budget & Management
- Designed network floor plans and cable-to-port mappings in AutoCAD

Grinding Machinist (G1/G2/G3) — Probationary — PTON Corp — Rosario, Cavite

Sep 2019 – Mar 2020

- Operated G1/G2/G3 surface and cylindrical grinding machines in a mold fabrication department to tight product specifications
- Performed preventive maintenance and quality checks; joined cross-departmental problem-solving meetings

JIG Boring/Milling Machinist & Quality Assurance — Philippine Yushin Inc. — Silang, Cavite

Feb 2019 – Jul 2019 (while in high school)

- Produced precision components to ± 0.02 – ± 0.05 mm tolerance on JIG boring and milling machines
- Conducted QA inspections and interpreted technical drawings/blueprints for machine setup

FEATURED PROJECTS

Kitchen One — Restaurant Management Mobile App (Capstone Project, 2026)

- Built with React Native, Expo, TypeScript, and Supabase (PostgreSQL); wireframed the full UI flow in Figma before development
- Implemented role-based access for customer, admin, and delivery rider user types
- Integrated GCash QR and COD payment options and designed an automatic rider-assignment algorithm
- Conducted user testing and feature verification prior to project demonstration

Personal Portfolio — 3D/Motion Website Redesign (Ongoing)

- Redesigning personal portfolio (React, Three.js/React Three Fiber, Supabase, deployed on Vercel) to merge an existing 3D scene into the main responsive site rather than keep it as a separate showcase

- Built a codebase knowledge graph with a custom tool (Graphify) so an AI coding agent can understand project structure without re-reading the full codebase, cutting token usage during development
- Designing adaptive 3D complexity (simplified scene on mobile, full interactive scene on desktop) and a single reusable modal component shared across Projects, Certificates, and Blog sections

Client Portfolio Website — “Creative Capstone” for a Client (2026)

- Built an 11-week interactive learning-journey site (global citizenship, cross-cultural understanding, sustainability, wellness) using React 19, TypeScript, Tailwind CSS v4, GSAP 3/ScrollTrigger, and Vite, deployed on Vercel
- Implemented a custom design system (color palette, Playfair Display + Inter typography) and scroll-driven animations, including hero entrance stagger, scroll reveals, and a mobile drawer navigation
- Organized 37 categorized resources and full weekly reflection content across four pages; diagnosed and resolved SPA client-side routing issues after deployment

AI-Orchestrated Development Tooling (.opencode/ + Graphify)

- Designed a portable 5-agent "dev team" system (Developer, Design, Game Dev, QA/Review, Ops/Planning subagents) with defined output contracts, deployable into any project
- Curated and integrated a library of 260+ development skills, including two original skill families for token-efficient commits/reviews and anti-overengineering audits
- Built a Graphify integration that parses a codebase into a searchable knowledge graph (nodes, edges, community clusters) with an interactive visualization and a condensed project-map summary for faster AI-assisted onboarding to unfamiliar code

ScanMe — Local Product Showcase (2026)

- Built a product showcase site for handcrafted snacks from Gubat, Sorsogon using React 19, Vite, and React Router v7
- Implemented dark/light theming via Context API with system-preference detection and WCAG-compliant contrast
- Optimized for performance with route-based code splitting, lazy-loaded images, and memoized components; deployed on Vercel with Git LFS for media assets

Gamified Learning App (2026)

- Built a cross-platform learning app (React Native, TypeScript, Expo Router) with dynamic topic/lesson routing, an XP/streaks/badges progression system, and Markdown-rendered lesson content
- Implemented AsyncStorage-based local persistence, Reanimated-driven UI animation, and light/dark theming via Context API

App Kopi / Kopi Shop — Coffee Shop Web & Mobile App

- Prototyped a static coffee-shop website (HTML/CSS/JS) for a local Bulan, Sorsogon café concept, deployed on GitHub Pages
- Rebuilt as a cross-platform mobile app (React Native, Expo, React Navigation) with About/Menu/Testimonials/Contact screens and EAS build configuration

Frames-to-SVG Extractor — AI-Assisted Animation Pipeline (Personal Tool)

- Built an automated Node.js pipeline that converts a generative-AI logo animation video into lightweight, infinite-resolution SVG frame sequences
- Used ffmpeg (with mpdecimate deduplication) to extract 94 unique keyframes from source video, then a custom script (jimp + potrace) to strip backgrounds and vectorize each frame to SVG
- Directed OpenCode CLI AI agents to generate the vectorization script and a requestAnimationFrame-driven React Native playback component (30fps), plus a zero-dependency local preview server

CERTIFICATIONS

DataCamp (6): Joining Data in SQL · Introduction to Relational Databases in SQL · Intermediate SQL · Database Design · Data Manipulation in SQL · AI Ethics

Anthropic AI (16): Claude 101 · Claude with the Anthropic API · Claude Code in Action · Claude with Amazon Bedrock · Claude with Google Vertex AI · Introduction to Model Context Protocol · Model Context Protocol: Advanced Topics · Introduction to Agent Skills · Introduction to Subagents · Introduction to Claude Cowork · AI Fluency: Framework & Foundations · AI Fluency: AI Capabilities & Limitations · AI Fluency for Students · AI Fluency for Educators · AI Fluency for Nonprofits · Teaching the AI Fluency Framework

Cisco Networking Academy (4): Networking Basics · Introduction to Modern AI · Apply AI: Analyze Customer Reviews · Apply AI: Update Your Resume

TESDA National Certificate II: Computer Systems Servicing (2017) · Technical Drafting (2019) · Bread & Pastry Production

code.org: The Hour of Code

EDUCATION

Bachelor of Science in Information Technology — Cum Laude

Sorsogon State University — Bulan Campus | Aug 2022 – Jun 2026

Senior High School — Trade Area (TESDA Tracks)

Sisters of Mary School-Adlas, Inc. | 2019

- Grade 11, 1st Semester: Computer System Servicing NCII
- Grade 11, 2nd Semester: CNC Machining NCII
- Grade 12, 1st Semester: Bread and Pastry Production NCII
- Grade 12, 2nd Semester: Technical Drafting NCII

Junior High School — Vocational/Technical Background

Sisters of Mary School-Adlas, Inc. | 2015

- Grade 7: Personal Computer Operation · Mechanical Drafting Technology · Metal Works Technology · Basic Industrial Technology
- Grade 8: Electrical Technology · Basic Industrial Technology · Adobe Photoshop · Personal Computer Operation
- Grade 9: Machining NCI · Tailoring · Electrical Installation and Maintenance
- Grade 10: AutoCAD NCII · Tailoring NCII · Machining NCII

ADDITIONAL EXPERIENCE

Keyboardist/Accompanist & Choir Member — Sorsogon State University STAND Band; Immaculate Conception & St. John Paul II Chorale (2019–Present); Sisters of Mary School Boystown Choir (2015–2019), including featured appearances on ABS-CBN's ASAP Christmas special

Languages: Filipino (Native) • English (Fluent) • Bicol (Native)
